Solid State Switch

Applications:

Any pulsed power application where high voltage, high current pulses needs to be switched. Isolated on/off switching via fiber optic interface. Water cooling required for high power applications. Switch failure diagnostics optional.

Peak Anode Voltage: 4kV

Peak Anode Current: 2500A

Critical rate of rise (di/dt)cr

on-state-current(I) = 1000A/us

Maximum Switching

Frequency = 600Hz
